ISLAMIC FINANCIAL SERVICES

Mohammed Obaidullah
Associate Professor
Islamic Economics Research Center
King Abdulaziz University
Jeddah, Saudi Arabia
FOREWORD

The Islamic financial services industry has witnessed a frenetic pace of growth during the last decade. While estimates about the size of the industry differ, conservative sources put the total assets of Islamic financial institutions at two hundred and thirty billion US dollars. Islamic financial institutions operate in over seventy-five countries and they are expected to grow at over fifteen percent during the next five years. Nonetheless, the fact remains that the industry is too small compared to the size of its potential market. The strength that lies in the number of one billion Muslims is yet to be exploited. One of the key impediments to the growth of Islamic finance is lack of awareness among Muslims about the Islamic alternative models of banking, insurance and investments.

Another key area of concern relates to lack of human resources adequately trained in the models and tools of Islamic finance. Islamic financial institutions have generally been recruiting from the pool of conventional bankers and financial professionals, who often find it too comfortable to camouflage conventional products and services as Islamic ones. The unsavory outcome of this is there for all to see. We now find a wide range of products and services, which are Islamic in form but conventional in every other sense. A solution to the above perhaps lies in creating greater awareness among market participants through research, education and training. The depositors, investors, bankers,
insurance professionals, financial analysts, regulators and policy makers need to be told the full story - why conventional financial products and services are not acceptable in Shariah; what are the specific elements and features that are unacceptable; what are the Islamic alternative products and services that fulfill similar needs and address similar concerns and finally whether the alternatives are efficient as well.

The present text by Dr Mohammed Obaidullah is a step in this direction. The text spans over all areas of Islamic financial services, such as, commercial banking, insurance, investment banking, fund management, project finance and what have you. In each area, the ideal Islamic alternative model is presented after a careful evaluation of the conventional product. To add spice to the story, the text includes over twenty illustrations from real life. I am sure the text would address a long-felt need, serve as a useful guide and be of immense help to students, researchers, teachers, finance professionals, regulators and policy makers in the area of Islamic finance.

Dr. Muhammad Najeeb Ghazali Khayat
Director
Islamic Economics Research Centre
This is a book about products, processes and mechanisms that are in use in the Islamic financial services industry. The text also focuses on how financial products and services should be designed and offered in this industry, given the need for full Shariah compliance. Instead of presenting facts and figures that quickly become obsolete, the text describes how financial products and processes develop as solutions to problems and as responses to profit opportunities and need for Shariah compliance.

The distinctive feature of this book is presentation of the products and services in the form of flow charts and blue prints that facilitate conceptual clarity and greatly simplify the learning process. For each product, the text provides a blue print that helps differentiate between conventional and Islamic products. All sensitive issues related to Shariah compliance are presented as “Issues in Product Management”.

The text covers products and services relating to commercial banking, insurance, investment banking & financial engineering, fund management and project finance and is therefore, neatly divided into five parts – each part devoted to one of the relevant sectors (in addition to the introductory part). Each part begins with a discussion of how products and services are conventionally offered in these sectors. This is followed by an evaluation of the same from the standpoint of Shariah compliance. Major elements and features that violate the
Shariah are highlighted. Then the Islamic alternative is presented. Since many of the Islamic alternative products and services require a more elaborate discussion, the discussion is extended over subsequent chapters.

The coverage of the text is up-to-date. There are frequent references to real-life practices. The text includes over twenty illustrations of actual products as they are offered to the Muslim investor or depositor community. These are presented as “Concepts in Practice” and appear as box items, distinct from the main contents. The information for the illustrations have been carefully culled from public sources – from websites of a cross-section of Islamic financial institutions and presented without any element of tinkering.

Organization and Contents

The text is organized as follows. Part One spans over two chapters. Chapter One provides an overview of the Islamic financial system. It presents an interesting blueprint of the Islamic financial system with all its components. Prior to this, norms of ethics and efficiency and how these shape the contours of a financial system are presented. Chapter Two elaborates on the norms of Islamic finance, such as, prohibition of riba and gharar and the need for mutual cooperation.

Part Two spans over seven chapters dealing with products and services that broadly fall under commercial banking. Chapter Three sets the tone with a discussion of how conventional commercial banking is practiced and undertakes an assessment of the same from the standpoint of Shariah compliance. The Islamic alternative models of commercial banking, as these have evolved over time are then presented. Chapters Four-Nine undertake a more elaborate discussion of specific products and services. Chapter Four focuses on the liability side of the balance sheet of an Islamic bank and discusses various deposit-related products that help mobilize funds from the savings-surplus units. The spotlight then shifts to the asset side of an Islamic bank. Financing products of an Islamic bank could be equity or partnership-based or debt-based. Chapter Five is devoted to the equity-based financing products. Chapters Six-Eight discuss debt-based financing products. The more popular financing products based on murabaha, bai-bithaman-ajil and ijarah are discussed in Chapter Six. Lesser popular financing products based on salam, istisna, gurd, istijarah are discussed next in Chapter Seven. All controversial products are relegated to Chapter Eight. It includes all debt-based financing products that are widely perceived to be Shariah-compliant in form only and not in spirit. Chapter Nine discusses fee-based commercial banking products.
Part Three is devoted to insurance and comprises two chapters. Chapter Ten begins with how conventional insurance is practiced and undertakes an assessment of the same from the standpoint of Shariah compliance. The Islamic alternative models of insurance are then presented briefly. The Islamic insurance products based on *tabarru*, *mudaraba* and *wakala* are discussed in a more elaborate manner in Chapter Eleven.

Part Four comprises three chapters dealing with investment banking and financial engineering. Chapter Twelve initiates the discussion with how conventional investment banking is practiced and undertakes an assessment of the same from the standpoint of Shariah compliance. The Islamic alternative investment banking products – both in the pre-market stage and after-market stage are then presented briefly. Chapter Thirteen focuses on venture financing, creation of securities and other services, such as, stock broking. Chapter Fourteen is entirely devoted to risk management products based on derivatives and financial engineering. The Chapter undertakes an elaborate discussion of basic risk management products based on options, forwards and futures and swaps. Some innovative examples of Islamic financial engineering are presented as product possibilities.

Part Five is devoted to fund management and project finance and comprises three chapters. Chapter Fifteen discusses how funds are managed conventionally through various mutual funds, unit trusts and real estate investment companies. The Chapter undertakes an assessment of the same from the standpoint of Shariah compliance. The Islamic alternative fund management products are then briefly presented. Chapter Sixteen elaborates on various issues relating to the fund management products. Chapter Seventeen deals with project finance. It begins with a discussion of project finance as is undertaken in the conventional way and goes on to examine the issue of Shariah compliance. Some project finance structures that are deemed Islamic are then presented. The important issue of risk sharing and management in the context of project finance is then discussed.

The text is targeted at graduate students and practitioners who would like to be initiated into the new discipline of Islamic finance. It therefore, avoids use of mathematical proofs and derivations. It also avoids highlighting areas of disagreement among scholars on the Islamicity or otherwise of specific products, processes and mechanisms, as this would be highly confusing to a new entrant into the field. We have in the recent past witnessed sharp differences of views on many exciting products that seek to address an economic need but are deemed controversial and score low in terms of Shariah compliance. Current literature on Islamic finance is replete with publications
that try to make a case in favor or against a particular product, service or process. The text of course, makes no attempt to evade the all-important issue of Shariah compliance. In most cases, the consensus view of mainstream contemporary scholars is presented and all “controversial” issues are presented as they are – labeled as “controversial” and relegated wherever possible to a separate chapter.

For easy reading and comprehension, there are no footnotes, and no endnotes. References are neatly divided into five parts that correspond to the structure of the contents and are presented at the end of the book. Since the book steers clear of arguments and proofs, the references are more in the nature of Suggested Further Readings in the areas. Readers may note that wherever I have quoted from the holy Quran, the first numeral within bracket refers to Surah number and the second numeral after colon refers to Ayah number.

Acknowledgements

I am much beholden to Dr Muhammad Najeeb Ghazali Khayat, Director and to all my colleagues at the Islamic Economics Research Center for being a constant source of encouragement in this endeavor. I had the privilege of discussing my plan for authoring this text on many occasions with Dr M. Nejatullah Siddiqi, former Professor at the Center for which I am indebted to him.

I am extremely thankful to the many reviewers of the various drafts of the book. Many of the good ideas are theirs; all of the remaining errors are mine. I am grateful too, to my students over the years, who have provided me with invaluable feedback and a wealth of suggestions for improvement. I would like to put on record my special thanks and appreciation for Br. Azad Ali of IBF Net, who helped me design the layout and draw the flow chart diagrams with his excellent MSWORD skills, and for Br. Syed Anwer Mahmood of the Islamic Economics Research Centre for producing the manuscript in camera-ready format.

Mohammed Obaidullah

## CONTENTS

*Foreword*  
*Preface*  
*List of Exhibits*  
*List of Concepts in Practice*

### Part I: A Financial System Based on Ethics

**Chapter 1. Islamic Financial System: An Overview**  
- Financial System Efficiency  
- Financial Products & Services  
- Financial Markets  
- Financial System Ethics  
- Norms of Ethics in an Islamic Financial System  
- Islamic Financial System: A Blueprint

**Chapter 2. Major Norms of Islamic Finance**  
- Norms Relating to *Riba*  
- Norms Relating to *Gharar*  
- Norms Relating to *Ta’wun*

### Part II: Commercial Banking

**Chapter 3. Commercial Banking**  
- Conventional Commercial Banking  
- Islamic Appraisal of Conventional Commercial Banking  
- Islamic Alternative(s)

**Chapter 4. Deposit Products**  
- Current (*Wadiah / Qard*) Deposit  
- Debit and Charge Card  
- Savings (*Wadiah / Qard*) Deposit  
- Investment (*Mudaraba*) Deposits  
- Issues in Product Management
Chapter 5. Financing Products (Equity-Based)  
- Trustee Partnership (Mudaraba) Facility 57  
- Joint Venture (Musharaka) Facility 59  
- Issues in Product Management 60  
- Declining Partnership (Musharaka) Facility 61  
- Areas of Application 64

Chapter 6. Financing Products (Debt-Based) – I  
- Deferred Payment (Bai-Bithaman-Ajil) with Cost-Plus Sale (Murabaha) Facility 68  
- Issues in Product Management 71  
- Leasing (Ijara) Facility 79  
- Issues in Product Management 89  
- Areas of Application 93

Chapter 7. Financing Products (Debt-Based) – II  
- Deferred Delivery Sale (Salam) Facility 95  
- Manufacture-Sale (Istisna) Facility 99  
- Recurring Sale (Istijrar) Facility 101  
- Benevolent Loan (Qard) Facility 101  
- Areas of Application 102

Chapter 8. Financing Products (Debt-Based) – III  
- Repurchase (Bai-al-Einah) 103  
- Credit Card Based on Bai-al-Einah 105  
- Bill Discounting (Bai-al-Dayn) 107  
- Tripartite Resale (Tawarruq) 109  
- Issues in Product Management 110  
- Areas of Application 112

Chapter 9. Fee-Based Products  
- Letter of Credit (Wakala) 113  
- Letter of Guarantee (Kafala) 114  
- Other Fee-based Services 115
Part III: Insurance

Chapter 10. Insurance
   Conventional Insurance 121
   Islamic Appraisal of Conventional Insurance 122
   Islamic Alternative(s) 124

Chapter 11. Insurance Products
   Tabarru-based Takaful 128
   Mudaraba-based Takaful 129
   Wakala-based Takaful 130
   Issues in Product Management 132
   Areas of Application 141

Part IV: Investment Banking & Financial Engineering

Chapter 12. Investment Banking
   Conventional Investment Banking 146
   Islamic Appraisal of Conventional Investment Banking 150
   Islamic Alternative(s) 153

Chapter 13. Investment Banking Products
   Venture Finance 155
   Creation of Securities 159
   Stock Broking 171

Chapter 14. Financial Engineering
   Conventional Financial Engineering 173
   Islamic Appraisal of Conventional Financial Engineering 175
   Forwards & Futures 177
   Islamic Alternative(s) 179
   Options 182
   Islamic Alternative(s) 184
   Swaps 196
   Islamic Alternative(s) 196
Part V: Fund Management and Project Finance

Chapter 15. Fund Management 203
   Conventional Fund Management 203
   Islamic Appraisal of Conventional Fund Management 210
   Islamic Alternative(s) 211

Chapter 16. Fund Management Products 217
   Issues in Product Management 218

Chapter 17. Project Finance 229
   Conventional Project Finance 230
   Islamic Appraisal of Conventional Project Finance 232
   Islamic Alternative(s) 233
   Issues in Product Management 238
